Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from Manual for Resident Engineers: Containing General Information on Railroad Construction During the construction of the Choctaw, Oklahoma Gulf Railroad Company's line across the State of Arkansas in 1899, the first fifty pages of this book were written by the authors and published in blue-print form as Instructions to their resident engineers, with a view of obtaining uniformity of method in both work and results. The note-books, estimates, and construction profiles made by the various resident engineers and filed in the general office on completion of the work were alike and of the standard form and stood the most searching examination in some litigation that followed the construction of the line. When the Choctaw, Oklahoma Gulf Railroad Company, in 1901, entered upon some five hundred miles of extensions and branches separated from one another, making personal supervision difficult and slow, the authors revised the body of the book, and also the standard specifications of the company, which, together with the tables of level cuttings, were added to the original instructions and published in book form for the railroad company's use, with the result that each of the fifty or more resident engineers employed during the year 1901 were able, without verbal explanations and instructions, to comply with the standards required. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at This book is a reproduction of an important historical work.
