Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from The Laws and Mechanics of Circulation: With the Principle Involved in Animal Movement 3. The Harveian theory of the circulation, 1628, but no explanation of the portal circulation and for maintaining it in correspondence with the absorptive processes for producing a balance, otherwise impossible; no explanation of the tissue-circulation or that connected with the cell-brood, the objective point for all the commerce, the cells being the workmen in the tissues; a vaso-motor system of nerves, but not competent to explain the phenomena manifested through them; no attempt to explain the numerous muscles and nerves (unknown to Harvey) to the vessels. 4. Numerous physiological experiments upon the nerves, muscles, blood-vessels, etc., by means of which deeply interesting phenomena are developed, but their relevancy to any fundamental circumstance in the organism, or connection with one another by reason of any principle in the mechanics, not shown; illustrated by explanatory cuts showing the mode of procedure. Traube's Curves are beyond its reach; so also the blood-pressure curves and the curves of intra-thoracic pressure. It offers no solution for the existence of inhibitor and accelerator nerves to the heart. It cannot explain the anatomy in the intestines, and why there should be a diaphragm in the mammalia only. It cannot get fat, albumen, alcohol or any non-dializable substance into the body, yet they are rapidly absorbed and the explanation easy. More or less remarks upon muscular irritability and contractility, but nothing of dualism in the muscles, without which musculation would be utterly impossible, etc., etc. The book large enough, too; some of them a thousand pages, nearly, fine press. No grasp, no continuity of relations, all differing, but...
