The World Makers: Scientists of the Restoration and the Search for the Origins o

By Poole, William.

Peter Lang. 1 No Jacket(s), 2010. soft. Book Condition: New. When educated men in the 17th century thought about the world as it was and the earth on which they stood, they found the common answers to their questions rooted in the Bible. Most people assumed that the teachings of theology and of natural philosophy (what we would later term "science") were in harmony, but there were radical new answers to such questions of origin too. Exploring the intellectual history of the early modern period, William Poole tells how those within the emerging discipline of experimental philosophy reacted to the opening chapters of Genesis to interpret the physical origin, the present status, and the final destination of the earth. The Royal Society of London, created in 1660 "for the improving of natural knowledge," was where these bold new answers to old questions were formulated, discussed, contested, and modified by men like Isaac Newton, Robert Hooke, Edmond Halley, and Thomas Burnet. Though modestly presented as an introduction to debates over cosmogonies, this brief volume brilliantly captures a crucial moment in the history of modern science as well as erudition. With seeming ease and a keen eye for the telling detail, Poole navigates...

Reviews

This book is definitely not simple to begin on studying but quite fun to see. I actually have read and that i am sure that i will gonna read through yet again once again in the foreseeable future. It is extremely difficult to leave it before concluding, once you begin to read the book.
