

A Manual of Comparative Dental Anatomy for Dental Students

By Alton Howard Thompson

Theclassics.Us, United States, 2013. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can usually download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1899 edition. Excerpt: . Comparative Dental Anatomy. CHAPTER I. GENERAL ZOOLOGY AND COMPARATIVE ANATOMY. (1) The Animal Kingdom is divided into two sub-kingdoms, --viz, (a) Invertebrates and (b) Vertebrates. These sub-kingdoms are further subdivided into classes; classes are divided into orders, orders into families, families into genera, and genera into species. Species is the last division into which animals can be classified, but if the individuals of a species vary much from the normal type, they may be classed as sub-species or varieties. All animals are grouped with reference to their plan of structure, and classification is made according to the system of organization, and without regard to superficial characters or resemblances except so far as external features may have reference to functions. (2) Vertebrates and Invertebrates are distinguished from each other by the presence or absence of a vertebral column or backbone. The Vertebrates have a...
